

## **TRAVEL WITH MEDICATION**

### **IMPORTANT INFORMATION**

My English is not sufficient to explain the necessary you need to know about my medication.

My medication is prescribed by my doctor/specialist. I need my medication on a daily basis. Especially during travel, I need more units of my medication in my carry on bag to prevent a situation that is not good for my health in case of delay of flights or other modes of transportation I use.

I have official documents needed to travel with my medication:

A letter from my doctor/specialist  
my Medical Passport (medical information)
